

Master BC80 Evaporative Cooler Sales Specification Sheet

Description:

The BC80 evaporative cooler offers a cost-effective alternative to traditional air conditioning and create a comfortable working environment for your employees or customers. Evaporative coolers cool the air using a simple natural process: the evaporating water decreases the temperature of the air. A pump takes the water from a tank and dampens a large pad made of natural cellulose. A powerful ventilator aspires air through the filter. The water evaporates from the filter and decreases the temperature of the air by several degrees. The fresh and clean air flows into the room and cools it down.

Product Code: BC80

Specification:

Power Supply: 220 - 240v 50Hz

Air Flow: 8000 m³/h

Maximum Area: 180 m²

Power Consumption: 330w

Water Consumption: 8 l/h

Water Tank Capacity: 100l

Direct Water Connection: 1/2"

Sound Level: 62dB(A)

Dimensions: 50 x 85 x 141 cm (LxWxH)

Weight: 32kg
