

Description:

The Dosko 337 stump grinder is built to fit through narrow paths, walkways, and gates. This makes these units very portable for backyard access. This unit comes standard with 700 series Greenteeth® which can be rotated in three, 120-degree increments for a fresh cutting edge in minutes.

The unique side discharge chassis keeps the majority of the cutting away from the cutting head giving you a clearer line of vision of the stump you are grinding.

Product Code: DOSKO13HP

Specification:
